

Innovate . Develop . Advance

NX Design Update Training

Course Overview

With each new major release of NX, Siemens deliver numerous improvements to the software addressing performance enhancements, platform stability and of course developing the existing toolsets as well as delivering exciting new ones.

These training courses come in two levels (fundamentals and intermediate) and ensure CAD users get exposure to the new functionality with plenty of hands-on time to explore the tools via a high quality learning experience, under the guidance of one of our expert trainers, to ensure each person realises the full potential of the software, thus delivering maximum productivity from the outset.

Who Should Attend?

Designers, Engineers, CAD/CAM Managers, Industrial Designers and Manufacturing Engineers.

Course Agenda: 1-3 days (Course Dependent)

- Gateway
- Sketching
- Modelling
- Synchronous
- Assemblies
- Drafting
- Visualization
- Curves
- Shape Studio
- Drafting Plus
- Product and Manufacturing Information
- Sheet Metal
- HD3D Visual Reports
- New functionality in user interface, sketcher, modelling, assemblies, drafting, sheet metal and surfacing

"From one-to-one training, group training events, workshops and online/telephone support. Each time has enabled me to use NX more efficiently and more effectively"

Sheffield Precision Medical

Recommended Courses

- NX Design essentials
- NX Surfacing
- NX Drafting essentials
- NX Sheet metal

Welcome to TEAM

The TEAM Difference? ...is the people we employ within the Company. Our engineering team come with many years of invaluable industry experience. Coupled with this is our long track record with both the software and our commitment to supporting our many customers who design using Siemens PLM technology.

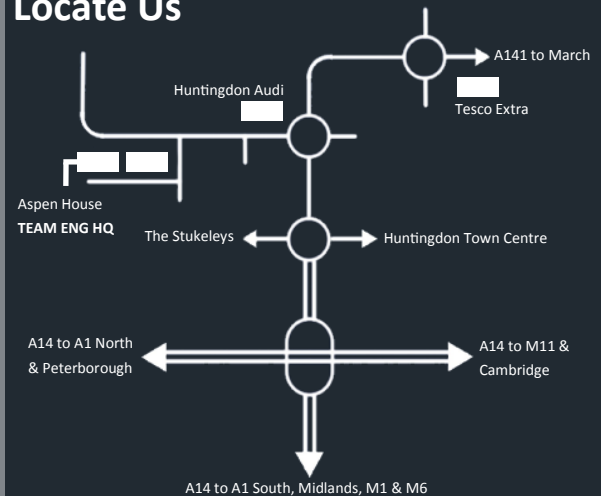

We like to think we have all the answers, but in fact, we listen first; then we work together - as a TEAM.
